■ SPHERGO® SURFACE CLEANING SYSTEM

Simple Design. Profound Impact.

The revolutionary SPHERGO® Surface Cleaning System — the SPHERGO® surface-cleaning base tool together with MicroWorks® microfiber cleaning pads — was developed specifically to address problems presented by using traditional rag cleaning and wiping systems for flat surfaces.

Musculoskeletal disorders (MSDs), including back and trunk injuries, carpal tunnel syndrome, bursitis, and tendonitis, are cumulative “ergonomic injuries” that commonly occur in workers in the cleaning and sanitation industry. The costs of MSDs to businesses can be massive in both human and financial terms.

Why SPHERGO®?

While manual cleaning with rags can be effective, the process requires a great deal of wrist motion and physical bending for extended periods. Rag cleaning results in the highest rate of fatigue and potential for MSDs. The SPHERGO® Surface Cleaning System is an ergonomic breakthrough, developed through extensive research and testing to address the physical challenges of manual cleaning of flat vertical and horizontal surfaces (walls, floors, mirrors, windows, etc.).

- Patent-pending spherical ball handle on the base tool allows the user to minimize musculoskeletal stresses common to manual cleaning processes
- The flat pad surface rotates around the ball handle, dramatically minimizing the wrist motions, repeated torso flexion, and straining movements that can lead to MSDs
- Tested according to REBA (Rapid Entire Body Assessment) guidelines, the SPHERGO system was found to lessen flexion, extension, and radial/ulnar deviation when cleaning, compared to the results when using a standard rag or mopping system
- Spherical ball handle is engineered for optimal ergonomic comfort, allowing a more neutral positioning of the wrist for greater comfort and productivity
- Base tool is fitted with the appropriate MicroWorks® flat microfiber cleaning pad for the application
- Faster and more efficient – greater surface area is cleaned in one motion
- Improves productivity, reduces fatigue, increases job satisfaction
